Agenda

- Group Policy Delegations
- Active Directory Delegations
- File and Folder Permissions

Group Policy Delegations

Default Group Policy Delegation

- Organize and manage Group Policy Objects in GPMC
- Used to delegate administration
 - Creating GPOs
 - Linking GPOs
 - Managing GPOs
 - Reading GPOs

Where Group Policy Delegation is Performed

- Creating GPOs
 - Delegated at Group Policy Objects node
- Linking GPOs
 - Delegated at Domain, OU, and site nodes
- Managing GPOs
 - Delegated at each GPO

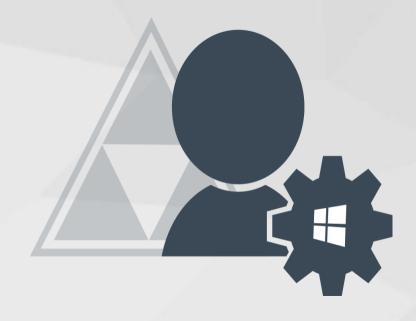

Reporting on Group Policy Delegation

- Screen captures
 - Creating GPOs
 - Group Policy Objects node Delegation tab
 - Linking GPOs
 - Domain, OU, and site nodes Delegation tab
 - Managing GPOs
 - GPO Delegation tab
- GPMC Scripts
- PowerShell Scripts for GPMC

Monitoring and Alerting on Group Policy Delegation

- Monitoring Tools
 - ADAP
- Alerting Tools
 - ADAP

Active Directory Delegations

Establishing AD Delegations

- Active Directory Users and Computers
 - Delegate Control Wizard
 - Establish at domain or OU level
- Typical Delegations
 - Resetting User Password
 - Changing Group Membership
 - Adding Computer to OU

Reporting AD Delegations

- Manually using Security tab on Domain/OU
- PowerShell (Does not provide details for permissions)
- DSACLS command

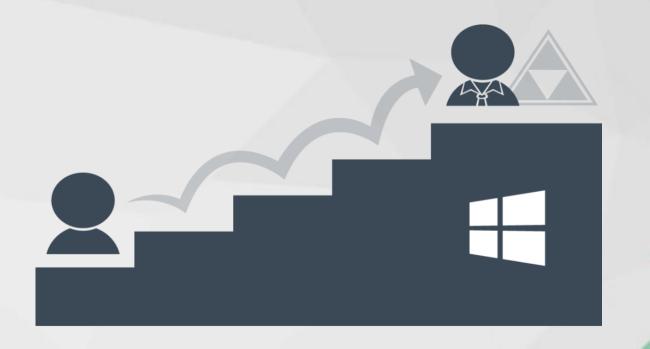

Securely Configuring AD Delegations

- Remove any delegations that are incorrect
 - Groups
 - All user accounts
- Use product that can "proxy" access to delegated tasks
 - Users can not bypass the product with ADUC
 - Need product to audit behavior of delegated users

Monitoring and Alerting on AD Delegations

- ADMP
 - AD Delegation
 - Provides Audit Reporting
- ADAP
 - Reporting
 - OU Management Extended Attribute Changes Permission Changes
 - Alerting
 - Alert for above report

File and Folder Permissions

Default File and Folder Permissions

- Default permissions might not be secure for environment
- Ideally, all file and folder permissions should be configured at creation time

Reporting on File and Folder Permissions

- ICACLS Windows Vista/2008 and greater
- XCACLS Windows XP/2003 and before
- ADMP
 - Security Reports AD Objects Accessible by Accounts

Securing File and Folder Permissions

- Configuring File and Folder Permissions
 - NTFS permissions should be established
 - Share permissions can be left at Everyone Full Control
 - No user accounts should be on the ACL

Monitoring and Alerting File and Folder Permissions

ADAP

- Monitoring File and Folder Permissions
 - File Audit File Audit Reports Folder Permission Changes
 - File, User, Server, Share
 - Server Audit File Integrity Reports
- Alerting File and Folder Permissions
 - Alerts for above reports

Summary

Summary

- Group Policy Delegations
- Active Directory Delegations
- File and Folder Permissions

Thank you!
